SUMMARY

With three years of experience in software development, I have developed a track record of driving online visibility by 30% and contributing to a 25% reduction in software bugs and errors. I am now keen to leverage my technical skills and experience to drive business growth and ensure quality assurance within a dynamic development team in the tech industry. My passion for learning, teaching, and professional growth has been a cornerstone of my career thus far and I am committed to applying these values in my future endeavors.
